

Session 4: Publications, Process, Decision Making

- Chair: Colin Perkins
- Presentation:
 - Summary and Provocation (Castro, Welzl)
- Relevant Submissions:
 - Understanding Internet Protocol Design Decisions (Welzl, Griwodz, Islam)
 - Characterising the IETF through the lens of RFC deployment (Castro et al.)
 - The Impact of Continuity (Griwodz, Islam, Welzl)
 - RFCs Change (Hoffman)
 - The Challenges of Cross-Document Coreference Resolution in Email (Li, Magliacane, Groth)
 - Project in time series analysis: e-mailing lists (Andersdotter)
 - Position Paper (McFadden)

Session 4: Publications, Process, Decision Making

- Chair: Colin Perkins
- Presentation:
 - Summary and Provocation (Castro, Welzl)
- Discussion topics:
 - How does the IETF make design decisions?
 - Can we understand, model, and improve the standards process?
 - How can we build a knowledge graph about the IETF documents and discussion?
 - What makes a successful RFC? How are RFCs used and referenced once published?
 - What can we learn from studying RFCs and IETF emails?
