Towards Environmental Sustainability with the IETF

Safiqul Islam (USN)
Christoph Becker (UvA)

IAB Workshop on Analyzing IETF Data (AID)   December 2, 2021

To what extent are climate impacts considered in the development and standardization of Internet protocols?

Methodology

1. List relevant keywords
2. List relevant text sources
3. Identify relevant texts
4. Thematic Coding and Categorizing

Methodology

1. List relevant keywords:

```
keywords = [                'environment',             'ipcc',
    'sustainab',            'global warming',          'ipo',
    'sustainable',          'greenhouse',              'mitigation',
    'sustainability',       'ghg',                     'temperature record',
    'climate',              'co2',                     'kyoto protocol',
    'climatology',          'emission',                'ozone',
    'ecology',              'carbon dioxide',          'sea level',
    'eco efficiency',       'pollution',               'solar wind',
    'eco-efficiency',       'fossil fuels',            'weather',
    'Ecoefficiency',        'Temperature',             'power consumption',
    'renewable',            'unfccc',                  'energy'
    'cop',                  'indc',                 ]
```

Methodology

1. List relevant keywords
2. List relevant text sources
   a. RFC √   small
   b. Active WG drafts 🕐
   c. Drafts of RFCs 🕐   Volume
   d. Meeting minutes ⊗
   e. Mail archives ⊗   large

√ : Done

🕐 : In progress

⊗ : To do

Methodology

1. List relevant keywords
2. List relevant text sources
3. Identify relevant texts
   a. Keyword search 🕐
   b. NLP ⊗
